

IVF “Cold Rush”

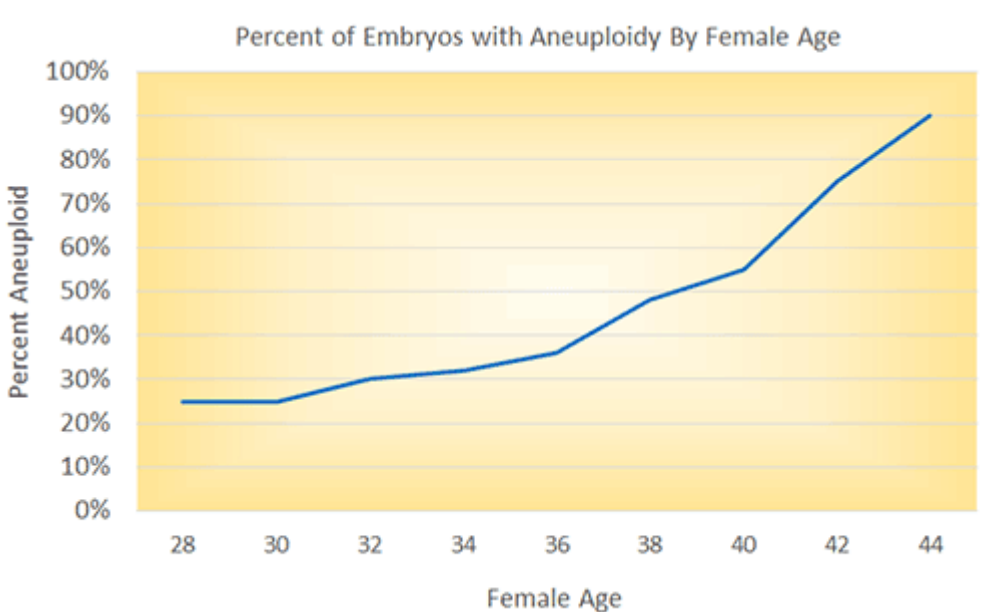

The 1849 Gold Rush created a frenzy after James Wilson Marshall's discovery of gold flakes at Sutter's Mill near Coloma, California. News of delivering the “perfect children” through IVF will soon have the same Gold Rush effect.

Frozen Eggs Success Rate > Fresh Eggs Success Rate

■ Frozen Eggs 63%
■ Fresh Eggs 55%

Preimplantation Genetic Screening (PGS) Tests Soaring

Humans have 23 pairs of chromosomes—for a combined total of 46.

12%
OF WOMEN AGES 15-44
EXPERIENCE INFERTILITY

Several studies have shown, overall, about **HALF** of human embryo preimplantations through IVF are chromosomally abnormal.

DID YOU KNOW?

IVF cycles that include PGS testing aides in the identification of embryos with chromosomes that are not abnormal, (Leary, 2017).
