

Enhanced features to support visualization of the uterus during pelvic laparoscopic procedures.

IDEAL FOR

Laparoscopic Procedures, Laparoscopic Tubal Occlusion, Diagnostic Laparoscopy, Salpingoplasty

BENEFITS

Reduced catheter shaft diameter (4.5mm) allows for easy insertion

Unique pear-shaped balloon conforms to anatomy and allows for a secure seal of the cervical opening to prevent injection leaks

Flexible extension prevents cracking of luer fitting

Atraumatic beveled catheter tip reduces trauma to the uterine wall.

UNIQUE HANDLE CHARACTERISTICS

TMI6003

Pinch-grip handle allows for quick and effective repositioning during procedures

TMI1151

Snap-on handle allows to easily place the cervical stop against the cervical wall

TMI1171

Sliding handle adjusts after insertion and locks into place to maintain a secure atraumatic hold on the uterus

Handle features larger grip for better leverage during manipulation
