

Tested to ensure non-pyrogenicity (LAL), HSSA and sperm compatibility

**BENEFITS**

**Shapeability**

Shapeable IUI catheters are manufactured with superior memory enabling the doctor to form the tip of the catheter to align with the cervical canal

Clear flexible & shapeable IUI catheters allow for full visibility of the washed specimen as it is injected into the uterus. The clear shaft also reduces the possibility of uterine spasms and retroflow by removing any visible air bubbles in catheter.

**Directional Injection**

Side hole near the tip is aligned with the printed depth marks and a flat side of the connector. The alignment allows the catheter to point towards either the left or right fallopian tube ostium for directional injection.

**TECHNICAL DATA**

French Size . . . . . 5Fr

Luer Type . . . . . Female

Dead Space Volume. . . . . see ordering information (ml)

Box Qty. . . . . 25 ea.

Not made with natural rubber latex.
